Missouri (the "Show-Me" State)

The name of the state is taken from the Missouri River, the longest river in the USA. Missouri became the twenty-fourth state of the Union in 1821. It lies at the centre of the United States. Its area is 180,546 square kilometres. The state is roughly rectangular, and its extreme dimensions are about 460 km from north to south and about 490 km from east to west.

The state is rich in natural resources. There is plenty of lead and iron ore, and waterpower is an important source of energy. The most important rivers are the Mississippi and Missouri. In addition, Missouri is a leading agricultural state. Agricultural products, like corn, cotton, wheat, hay, rice, fruits and vegetables are all important. The state's most important manufactured goods are shoes, tobacco, hats, beer, cars, and aircraft. The climate of Missouri is continental. It is cold in winter and hot in summer. It rains in the spring and there is often snow in the winter. Tornadoes may strike anywhere in the state, especially in the spring months.

The population of Missouri is about five million. There are some big important cities in the state, including Jefferson City, the capital, Kansas City, St Louis, Springfield, Independence, St Joseph, and Joplin. Many tourists visit Missouri because it has beautiful countryside and many lakes, especially in the hill area of the Ozarks. Also popular is Hannibal, the birthplace of the writer Mark Twain. You can visit the Mark Twain Home and Museum there. President Harry S. Truman was born in Missouri too. His boyhood home was Independence.
